

BioCor-E-XTRA[®] VCI-Power Card flexible

VCI NATURALLY BETTER

VCI Corrosion Protection
For the electronic future

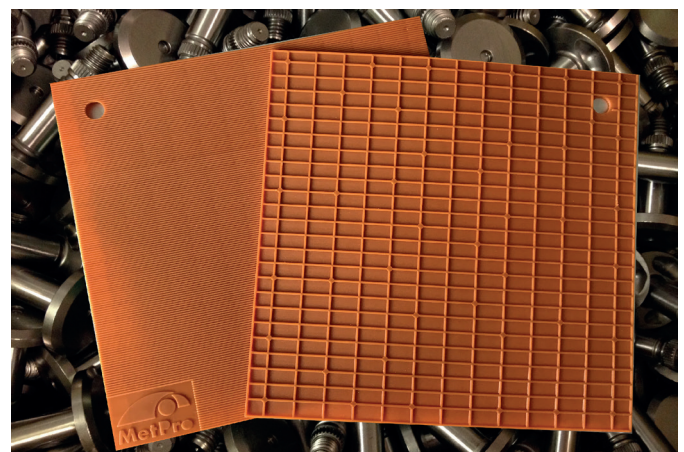

- + Improved corrosion protection
- + No influence on the conductivity
- + Natural ingredients
- + Occupationally Safe
- + Without residue and clean

A TRANSCENDIA BUSINESS

BioCor-E-XTRA® VCI-Power Card flexible

EXCELLENT PROTECTION FOR CORROSIVE SURFACES AT ELECTRONIC COMPONENTS!®

„MetPro BioCor-X-TRA® VCI-Power Card flexible“ is a new generation of VCI that offers a super E-XTRA anticorrosion effect even for sensitive electrical components. Corrosive surfaces of electronic components are protected without residue and the conductivity is maintained. „MetPro BioCor-X-TRA® VCI Power Card flexible“ provides true multimetallic protection for long transport and storage times. The integrated vapor phase inhibitors consist of all-natural extracts, free of amine, nitrite and benzotriazole, and are thus safe for occupational health as well as TRGS 900 and TRGS 615 compatible. The sophisticated dosage also takes account of the demand for resource conservation and recyclability. Format 200x200x25 mm. Material: LDPE

EVERYONE IS TALKING ABOUT E-MOBILITY - METPRO MOVING FORWARD WITH BIOCOR-E-XTRA® VCI

Excellent protection for:

- Corrosive surfaces at electronic components
- Super E-XTRA effect for copper
- Bulk goods, as an addition to PE bags, boxes, containers and cabinets
- All metals

BioCor-E-XTRA® advantages:

- VCI corrosion protection from nature
- Natural ingredients and thus occupationally safe
- Structure of the cards offers large VCI evaporating surface
- Cards are cuttable and therefore ideal to dispense
- Easy handling
- Long effectiveness
- No influence on the conductivity
- VCI effect is retained even when e.g. after customs checks the packaging is closed again.
- Without residue and clean
- Reusable
