# CorroMove® VCI Rust Removing Wipes

**EFFECTIVE RUST REMOVAL - JUST BRING METALS BACK TO SHINE! SIMPLE, SAFE AND FAST!**

MetPro CorroMove® VCI Rust Removing Wipes are designed to clean and offer corrosion protection to machinery, parts and components. They are effective in removing oil, grease, dirt and light surface corrosion. MetPro Wipes leave behind a corrosion preventative layer ensuring that metal surfaces are preserved and ready for storage, transit or operation. MetPro Rust Removing Wipes are ideal for a range of uses and are suitable for both industrial and commercial applications. They are capable of cleaning tools, office equipment, spare parts, machinery, components etc, while removal of light surface rust and corrosion protection is also assured.

## Applications MetPro CorroMove® Rust Removing Wipes

- Cleaning of parts and components prior to assembly.
- Slightly rusted ferrous parts.
- On assembled units where light oil, dirt and fingerprint removal is necessary.
- General use in auto garages and repair shops.
- Electrical equipment and switchgear.
- Ammunition and military equipment.

## FEATURES AND BENEFITS MetPro CorroMove® Rust Removing Wipes:

- Offer an ideal cleaning system where metal parts or assemblies are involved.
- Removes light surface rust, arrests the rusting process, and maintains parts.
- Contains corrosion inhibitors that will leave your parts rust free for months.
- Utilizes non-linting cloths and user friendly packets to ensure a tough and durable cleaning system.
- Safe to use and environmental friendly.
- Cost effective and reduces the need for multiple cleaning and protection systems.
- Reduces inventory and increases productivity.
- Eliminates handling of flammable and hazardous liquid solvents.
